

The Scaling Kit

visual metaphors for noticing change

Ten web-based interactive scaling masters and a booklet of suggested uses

Scaling is a time-honoured, simple and versatile evaluation tool—perfect for measuring change and noticing progress. In these ten web-based interactive scaling masters you will find the familiar image of a temperature gauge along with others such as a ladder, pendulum, circle, balance, pathway and water tank. Use your mouse to move up and down each scale; use the text box to make notes... and then print the scale for your records.

- Ten web-based interactive scaling masters with moveable components and text bubbles
- a booklet filled with ideas for use with clients, students, teams, families, project managers, organisations and communities.
